

BX, RX AND LENS GASKETS

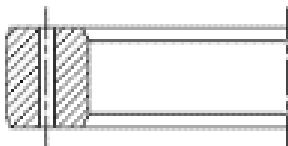

BX – RX

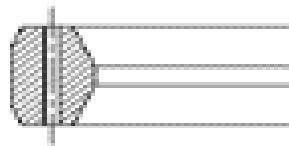

Lens

- ERRE.DI BX and RX gaskets are designed for applications involving a pressure higher than 20000 PSI (140 MPa). We drill a hole in order to balance the pressures. These gaskets refer to API 6A standard.
- ERRE.DI Lens gaskets are widely used in the production of fertilisers, check valves, shut-off valves and high pressure valves. They refer to constructive standard DIN 2696.
