

## PTFE EXPANSION JOINTS

ERRE.DI PTFE expansion joints shall be indicated for the passage of aggressive fluids, since they ensure an almost universal corrosion resistance.

Our PTFE expansion joints are designed to absorb axial, lateral and angular expansions and vibrations of the piping.

Sizes may range from DN 15 mm to DN 500 mm, and with a number of undulations of 2,3 or 5.

We can provide carbon steel with electrolytic zinc treatment, stainless steel AISI 304/316 flanges and limiters tie rods,
